EXPERIENCE

VBRATO / Ekko

May 2023 - Present

Software Engineer

Remote / US

- Cut a pipeline processing 1M+ artists and 100M metrics from 9 days to 7 hours via parallel processing and atomic writes.
- Split a monolithic CloudFormation stack into independently deployable serverless GraphQL and REST services across three environments.
- Built a Next.js web app from scratch with modular architecture, reusable components, an AWS Amplify GraphQL data layer, CI/CD, and E2E tests.
- Built real-time messaging and notifications with rooms, presence, read state, unread counts, and mobile push, reducing vendor costs.
- Built core features across two Expo apps: high-performance audio playback, payments/payouts, and media handling.

GeoAlert

Dec 2022 - Jun 2023

Frontend Software Engineer

Uzbekistan

- Integrated Keycloak SSO into a Next.js geospatial platform, migrating existing users with zero downtime.
- Led a platform-wide state migration from Effector to React primitives and Zustand.
- Built dashboards for configuring geospatial jobs, reviewing satellite/aerial map layers, and managing teams.

Livereach

Nov 2021 - Jan 2023

Software Engineer

Remote / EU

- Migrated core workflows in a social-content platform from Angular to React with full feature parity and no user disruption.
- Built a signals-based state manager for a React app embedded in e-commerce sites, replacing Redux and cutting its JS bundle by 20%.
- Built a private npm registry on AWS with automated cross-environment publishing for shared packages.

Moishlem

Aug 2020 - Oct 2021

Backend Software Engineer

Remote / EU

- Integrated banking APIs for recurring payments into a serverless NestJS sports-insurance platform.
- Built a React admin dashboard for user management and support operations.
- Redesigned the PostgreSQL schema and consolidated two backends into one codebase.

Hitide

Dec 2020 - Feb 2021

Software Engineer & Maintainer

Remote / EU

- Automated e-commerce product, order, and payment workflows previously handled by engineering and support.

PROJECTS

LeTUI

2025 - Present

RUST, TYPESCRIPT

- Built and published a cross-platform terminal UI library with a Rust renderer and TypeScript API over Bun FFI, shipping native macOS, Linux, and Windows binaries.
- Implemented signals-based state, persistent layout/text rendering, incremental cell updates, scrolling, input routing, and theme detection; built a coding-agent client with SQLite and the Codex app-server.

Xport

2026 - Present

TYPESCRIPT, POSTGRESQL

- Built and deployed a web app and npm CLI for exporting X threads, timelines, and articles to Markdown/JSON, with OAuth and Polar credit billing.
- Built a resumable PostgreSQL-backed job runner with persisted cursors/results, atomic claims, runner-owned state updates, and stale-job recovery.

STACK

LANGUAGES

TypeScript, JavaScript, Go, Python, SQL, Rust

FRONTEND

React, Next.js, TanStack, React Native, Expo, Playwright

BACKEND & DATA

Node.js, NestJS, Fastify, Echo, GraphQL, REST, PostgreSQL, Drizzle

CLOUD & TOOLING

AWS, Docker, Playwright, Bun, Stripe, Git, Linux

EDUCATION

Tashkent University of Information Technologies

BSc in Software Engineering
Aug 2019 - Jul 2023
GPA: 4.57/5
